

# BAYTEX COMPANY PROFILE

Updated on 08/01/2023

[WWW.BAYTEXBD.COM](http://WWW.BAYTEXBD.COM)

# WELCOME TO BAYTEX

Baytex is a garment manufacturing company formed by an entrepreneur and has been dedicated to manufacturing garments and maintaining production for more than 19 years. And working with so many international brands, like Truworths, Aca Joe, Lee Cooper, Culture Sud, Southwest, etc.

Baytex is one of the pioneering garment industries in Bangladesh. With a current capacity of 420,000 pieces per month, the company has seven production lines and is constantly expanding. Our annual export is in the range of \$15 million. We expect to reach above \$40 million in the current year. Equipped with modern machinery, our total number of machines is above 400 and increasing. Baytex complies with all laws and regulations of the country where it operates and has ratified international conventions. Our daily capacity is 14,000 pieces. We host more than 500 employees currently. We launched three new production lines for active wear and work wear in 2019. We believe that in the case of product quality, on-time delivery, and client satisfaction, a competitive price should always be maintained.

# OUR STORY

Our Chairman, Mr. Bimal Karmoker, was born at Gopalganj, in 1969. He had a modest upbringing in Gopalganj. The first of 07 siblings and the eldest son, Mr. Bimal moved to Dhaka in the late 1980s to begin working in his maternal uncle's garments factory. While working in the factory, Mr. Bimal picked up numerous skills that made him proficient in the technical side of garments manufacturing and control. His work ethic, hardworking nature, and production foresight saw him take on more responsibility.

After acquiring 20 years of manufacturing knowledge and technical experience in Evince Group & Spectra, Mr. Bimal established his own company. Baytex was born in 2015. Located at Gouripur, Ashulia, Dhaka, the factory initially consisted of only 5 production lines, focusing on woven tops. Under his leadership Baytex grew rapidly over the next few years, leaping ahead of the competition to become one of the best garments manufacturing factories in the country. Mr. Bimal navigated Baytex success through the manufacturing landscape of Bangladesh, securing its position as a manufacturing powerhouse in knit & woven garments. Unparalleled in quality, Baytex now comprised of 10 active production lines. Our chairman's second generation is now running the business under his direction.

# OUR OBJECTIVE

We care about the quality, not the quantity.

Since the established of BAYTEX, our mission is to serve our clients with quality products and services and on-time deliveries, to achieve unlimited client satisfaction.

We aim to create one of the top manufacturers in the garment industries in Bangladesh as well as in the international arena through modern trends and brands, capacity-building activities, and awareness-raising programs for building moral responsibility and accountability towards the nation and in turn, the world.

Clients are our biggest asset. Without a strong customer base, a business will fall apart. Although acquiring new customers is necessary for business growth, maintaining good relationships with our current customers is also important to us. We believe in long-term business by providing quality products, on-time shipment, and reliability.

# WHY CHOOSE US

Our strategy is designed to help our clients develop their products with seamless collaboration, utmost efficiency, optimized knowledge management, and a perfect workflow to boost the core strength of the company. As a result, our clients can enjoy the stronghold of work, the improvement of efficiency, and an increase in returns. We give high importance, while making sales, to the satisfaction of our clients. by balancing between price and quality.

**HIGH PRIORITY:** We give high priority to our valuable clients. We believe in quality rather than making profit and want to build a long term relationship with our clients.

**ON TIME SUPPORT:** We are available 24/7 to ensure our uninterrupted services to our clients. Our merchandising teams are active always to give you support.

**QUALITY:** Providing premium quality and to maintain relationship with our suppliers are our keywords. We are proud to develop enduring suppliers who are able to provide quality & exact goods as per buyer requirements.

**SAMPLING:** We provide sampling support to our clients at no cost. Our experienced and dedicated sampling team really cares about your needs.

**SUSTAINABILITY:** We believe that without sustainable values and practices, the days of our planet are numbered. Our company cares about natural resources and invests in renewable energies.

**CLEARING & FORWARDING:** We have our own C&F to help the smooth flow of the international trades, such as clearance import and export goods.

# QUALITY MANAGEMENT

Check our quality management at a glance.

Quality control is a set of test methods, inspections, and analytical procedures. Which are applied to raw materials, intermediate products, and final products to provide feedback to the quality assurance system and ensure that the system is working correctly? Each department has its own particular methods of testing and inspection.

Raw materials are inspected at reception. Fabrics, thread, trims, and accessories are checked for, e.g., knitting faults, printing faults, correct widths, and distortions. Interlining, buttons, strings, ribbons, etc. may also be tested for various aspects of performance. The wearing and aftercare properties of the top cloth may need to be established to determine the type of aftercare label that will be appropriate for the garment. The fabric may be tested for our behaviour towards heat, pressure, and moisture. Shrinkage are also tested for further procedures.
